SANITARY LINE TREATMENT FOR NAVY SHIPS:

INTEK CHTC is an approved sanitary line scale prevention treatment for Navy Ships. It is environmentally safe and approved for use in both Freshwater and Seawater flushed systems. INTEK CHTC is intended for use in each toilet and urinal, once a day. This 8 LB. (3.63 KG) container of INTEK CHTC is sufficient for approximately 100 once-a-day doses. Each dose is applied using the plastic Scoop (53 cc) that is supplied with each container.

APPLICATION:

After normal cleaning of a toilet or urinal, flush the toilet or urinal at least once to remove all residual cleaning agents from both the bowl and toilet brush that was used for cleaning. Add one slightly rounded Scoop (1.4 oz.) of INTEK CHTC to the water in the toilet or urinal. Stir gently, using the toilet brush, then flush. Some blue crystals may remain in urinals after treatment but will dissolve during the facility's normal daily use. Repeat once every day.

CAUTION:

KEEP OUT OF REACH OF CHILDREN. In case of eye contact, flush immediately with plenty of water for at least 15 minutes and get medical attention. If swallowed, give large quantities of water or milk and get immediate medical attention. If inhaled, remove person to fresh air. If on skin, wash thoroughly with soap and water.
