INTEK Hull Cleaner

is a nonacidic, nonhazardous, biodegradable, single step hull cleaner and brightness enhancer. It rapidly and safely removes dirt, salt, oils, microorganisms, stains, mold and mildew, at ambient temperature, without staining, corroding or other harmful effects. It gives excellent results when used mixed with ordinary tapwater. It will not damage brightwork, wood, fiberglass or other synthetics or nonmetallics and it will not alter their natural appearance.

INTEK HULL CLEANER is nonhazardous and biodegradable, virtually eliminating health and safety risks to both the worker and environment.

INTEK HULL CLEANER removes stubborn contaminants and stains, disperses undissolved particulate material, and brightens surfaces in a single step.

INTEK HULL CLEANER is a nondusting, fine granular product that readily dissolves in ordinary tapwater. Once dissolved, there is no special worker protection required to deal with chemical odors or fumes. Solution concentrations up to 10% by weight are easily prepared, without concern for exothermic reaction, foaming or precipitation.

INTEK HULL CLEANER offers great savings by eliminating the need for precleaning to remove oils, and by eliminating the unnecessary packaging and shipping of high water content aqueous products and the associated extra drum disposal costs.

PHYSICAL & CHEMICAL PROPERTIES

Appearance.....	White powder
Odor.....	None
Bulk Density.....	77 lbs/ft ³
Water Solubility.....	Complete
Freezing Point.....	Will not freeze
Flash Point.....	Not applicable
Evaporation Rate.....	Not applicable
% Volatile by Vol.....	Not applicable

INTEK Hull Cleaner

BENEFITS

- Safe for personnel: Nonacidic, Nonvolatile, Nonfuming, Odor-free
- Safe for equipment: Noncorrosive, Nonstaining
- Safe for the environment: Biodegradable, Nonpolluting
- Removes dirt, oil, grime and stains, without damaging underlying surfaces or brightwork.
- Works rapidly at ambient temperature, without high pressure water or extensive scrubbing.
- Will not fade or alter colors of other materials accidentally contacted during application
- Nonhazardous and safe to use.
- Dissolves readily in ordinary tapwater.
- Easy to apply and remove.
- Inexpensive to ship and store.
- Does not freeze; can be shipped in winter in unheated trucks
