INTEK Bilge Cleaner

is an exceptionally effective, heavy duty, free flowing powdered product that safely removes and emulsifies oils, grease, scum, and grime, as well as the contaminants they entrap, without attacking equipment or underlying materials of construction.

INTEK BILGE CLEANER is a biodegradable, mildly alkaline powdered product that readily dissolves in water. Once dissolved, it rapidly emulsifies oils and loosens and disperses entrapped contaminants, thereby preventing their redeposition and enabling them to be easily flushed or wiped away.

INTEK BILGE CLEANER can either be added directly to bilge water or, if the bilge is dry, premixed with water (1 - 2 ounces per gallon of water) before adding/applying to the bilge. It removes most contaminants with the normal sloshing action due to the boat's movement. Exceptionally stubborn areas will benefit from wiping or light scrubbing with a medium bristlebrush. After removing the used solution from the bilge, a water rinse, although not required, may be beneficial.

INTEK BILGE CLEANER is shipped as a 100% active powdered product. This offers substantial savings by eliminating the unnecessary packaging and shipping of water associated with many aqueous products.

PHYSICAL & CHEMICAL PROPERTIES

Specific Gravity (at 75° F).....	1.65 ± 0.05
pH (of a 2.0% solution).....	9.5 - 10.5
Vapor Pressure (mm Hg).....	Not applicable
% Volatile by Vol	Not applicable
Water Solubility.....	100 % Miscible
Appearance	White powder
Odor	None to slight Ammonia
Flash Point (°F).....	Nonflammable

INTEK Bilge Cleaner

BENEFITS

- Safe for personnel: Nonacidic, Noncaustic, Nonflammable, Mildly alkaline
- Safe for equipment: Noncorrosive¹, Nonfoaming
- Safe for the environment: No Bioaccumulation, Biodegradable
- Strong enough to remove difficult oils, yet safe to use
- One-step cleaning: Quickly removes and emulsifies oils, grease and grime.
- Economical and convenient
- Free rinsing: Does not leave a residue.
- No evaporation loss
- Not a fire hazard (nonflammable)
- Environmentally safe²
- Compatible with most surfaces¹
- Can be diluted with fresh or sea water

1. Extended exposure can mildly etch aluminum

2. Without oils and contaminants removed
