INTEK MarineClean

INTEK's MarineClean

is an exceptionally effective heavy duty, low foam industrial cleaner and oil emulsifier concentrate that safely removes grime, oil and the contaminants they entrap, without attacking equipment or underlying materials of construction.

MarineClean is sold as an "Ultra Concentrate", thus, providing users a one-product solution to a wide range of general purpose as well industrial cleaning and degreasing challenges. Depending on the job, **MarineClean** can be diluted with water up to a ratio of 100 to 1. (i.e., **ONE GALLON OF MARINECLEAN CAN MAKE UP TO ONE HUNDRED GALLONS OF CLEANING SOLUTION!**)

MarineClean safely and thoroughly removes oils, grease, and grime from most surfaces. **MarineClean** is an effective and economical choice for the removal of grease, gasoline and diesel fuels, cutting oils, lubricants, machine oils, and miscellaneous dirt and grime from equipment and surfaces, such as:

- Fuel Oil Tanks
- Bilges, Sumps
- Floors, Walls, Decks
- Piping, Pumps, Valves
- Tools & Equipment
- Piping Systems
- Trucks
- Barges
- Ship Tanks
- Refinery Units
- Storage Tanks
- Concrete

MarineClean is shipped as a super-concentrate. This offers substantial savings by eliminating the unnecessary packaging and shipping of water associated with most pre-diluted aqueous products

and by eliminating unnecessary drum disposal costs.

MarineClean BENEFITS

- Safe for personnel: Aqueous based, Mildly alkaline, Noncaustic, Nonflammable
- Safe for equipment: Noncorrosive, Nonfoaming
- Safe for the environment: No Bioaccumulation, Biodegradable
- Strong enough to remove difficult oils, yet safe to use
- One-step cleaning; quickly removes oils, grease and grime, at ambient temperature.
- Economical and convenient
- Free rinsing: Does not leave a residue.
- Minimal evaporation loss
- Not a fire hazard (nonflammable)
- Environmentally safe
- Effective with a variety of application methods including pressure washing
- Compatible with most surfaces
- Dilute with either fresh or sea water
- Discharge of uncontaminated product is acceptable at most sewage treatment plants
